

## How to open the remote dashboard on mobile devices.

With this guide, you will be able to login to the remote dashboard with your mobile device and therefore not be bound of a stationary PC.

Scan the QR code with your phone or tablet, this will open the login for the chat.

Then login with your credentials:

Alternatively type this URL in your browser on your mobile device:

<https://macsremote.obd.help/login>

The chat connection and remote module connection is two separate connections, if you disconnect / connect one it will not affect the other.
